

# Business Office Computer

By: Kristien Shaji

## Pg.1 - You Application Topic

- A Business laptop computer is a portable personal computer powered by a battery, or an AC cord plugged into an electrical outlet, which is also used to charge the battery. A laptop also has a thin display screen that is attached and can be folded flat for transport.
- A Business laptop is a personal computer that is small enough to sit in a person's lap, and is designed for mobile uses. Also called notebooks, laptops are smaller, thinner and lighter than most desktop PC
- Most people decide to purchase Business laptops due to their portability and convenient size. Those who write or work online will find their laptops more convenient. They are portable, while a PC is not.

## Speed VS. Portability

Speed	Portability
<ul style="list-style-type: none"><li>- Lenovo - Yoga 730 2-in-1 13.3" Touch-Screen Laptop - Intel Core i5 - 8GB Memory - 256GB Solid State Drive - Platinum</li><li>- Best Business Laptop for Speed</li></ul>	<ul style="list-style-type: none"><li>- 13mm thin and grippable design to the 12 hour battery life, this Chromebook is a perfect everyday business companion.</li><li>- The 13.3" touchscreen has a 1920 x 1080 resolution, while dual speakers offer powerful, clear sound.</li><li>- Best laptop for portability.</li></ul>

## Top 3 Features

- The Top 3 most important features for a laptop would be: 1. Portability, 2. RAM Memory, and 3. CPU Processor Chip.
- I put Portability as the most important because, it is the most important obviously. In a business that requires a trusty, compact, and fast computers, the best bet would be the Business laptop.
- I put RAM Memory as the second most important because lots of business files i.e. presentations, notes or blueprints, can take up a lot of RAM Storage.
- And lastly I put CPU Processor Chip as third because since the CPU Chip is responsible to carry out all the tasks on the laptop, I put this third because if the performance is better, then the sales will become better depending on the prices.

## Pg.2 - Would-Be-Nice Features

My top 3 would be nice features are as the following.

1. Keyboard, Mouse and Monitor - The reason I put these 3 parts is that, I don't need any of these upgraded from a original Business office laptop but since I had the chance I would p these parts as my priority because I don't really like the mouse pad or keyboard on the laptop. The reason being is that they are either really unresponsive or I just don't like they feeling of touching them. In my opinion this is not worth upgrading for.
2. Sound Card - The second would be nice features is the Sound card. The sound card is again not needed for the business laptop but in some cases, i.e. playing a video to show your colleagues, the sound card can be useful. In my opinion this is worth upgrading for.
3. Graphics Card - And my last priority is the graphics card. A good Graphics card is also not needed for a regular business laptop because there is no point but in some cases, i.e. playing a video to show your colleagues, the Graphics card can be useful. In my opinion this is worth upgrading for.

# Suppliers & Vendors

**Mouse** - Logitech Optical USB Mouse B100 (910-001439) Black 3 Buttons 1 x Wheel USB Wired Optical 800 dpi Mouse - \$19.84

**Keyboard** - Logitech K120 Black USB Wired Standard Keyboard - FR - \$20.93

**Sound Card** - Channel 5.1 Surround 3D PCI Sound Audio Card for PC Windows XP/Vista/7 - \$19.98

**Graphics Card** - GIGABYTE GeForce GT 1030 Low Profile 2GB, GV-N1030D5-2GL - \$25.99

## Pg.3 - Your Budget Machine

### Specs

- Intel Core i5 8th Gen 8265U (1.60 GHz)
- 8 GB Memory 256 GB SSD
- Intel UHD Graphics 620
- 1920 x 1080
- Windows 10 Pro 64-bit
- Pre-Packaged
- \$799.99
- Intel Core i5 8th Gen
- 8 GB Memory 256 GB SSD Intel UHD Graphics 620
- Windows 10 pro 64-bit
- NewEgg

### Priority Components Included

- The components that I put a priority on was Portability, Windows 10 pro, and CPU processor.
- For this price this is a decent business laptop because of its Specs and its powerful processing.

### Priority Components left out

- The components that I unfortunately had to leave out was its Memory battery life, and it's intel core processor.
- This laptop could have been top notch if it just included a double battery and a i7 intel core processor.

## Pg.4 - Your Dream Machine

### Specs

- Intel Core i7 1.90 GHz
- 8 GB Memory 256 GB SSD
- UHD Graphics 620
- 1920 x 1080
- Windows 10 Pro
- HP Elitebook 840
- \$1992.99
- Quad-core (4 Core)
- In-plane Switching (IPS) Technology
- NewEgg

### Priority Components Included

- The components that I put a priority on was Portability, Windows 10 pro, and CPU processor.
- For this price this is a excellent business laptop because of its Specs and its powerful processing.
- Arguably one of the best laptops for a business person

### Priority Components left out

- For this laptop no special features that I wanted were left out in the process.
- It had a i7 core intel Processor.
- And has a double battery(backup battery.)

### Components I spent Extra on

- The components that I spent Extra money on with my \$2000 was Quad-Core CPU support, IPS Display tech, 3 cell battery, and it's size which is 1920 x 1089.
- Overall the extra spent money went to good use.
